

NID

It is made of pure honeycombed wool: an absolutely new weave in relation to the material that gives this blanket a three-dimensional, tactile, dry and elastic look at the same time. Thanks to the honeycomb, Nid is warm, but light, so it is also suitable for less cold times. Color is also a key element for this blanket. The continuous and seasonal shades of the palette, thanks to "garment dyeing", give the fabric the best volumetric yield and the product the qualities of a unique piece.

MULTI PLAID

Multi Plaid is a warm and enveloping embrace for the cold season, to use on the bed or to snuggle up on the sofa. It is a soft alpaca bouclé with a mélange effect. Born from a continuous desire to change, exploring new solutions in home textile collections, Multi Plaid is a very soft, warm, and multicolored cover.

BLUESKY

Set of soft double face quilts in velvet and linen.

The combination of the two fabrics, similar in weight, creates a silky and light quilt - ideal for adding a touch of color to both the bedroom and the living room.

The contrast between the fabrics creates a surprising result that makes the quilt precious and unique.
