Cork Bowls

Turned from pure cork, the Cork Bowls have a characteristic surface pattern and are velvety to the touch. They are available in two sizes and can be used as a shallow bowl or tray.

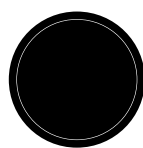

Cork is a renewable raw material that is consistent with Vitra's commitment to sustainability.

The Cork Bowls are created from coarse-grain recycled cork with a surface marked by notches and colour variations, highlighting the natural properties of this premium-grade material. Each Cork Bowl exhibits a lively, unique pattern.

Materials

- **Material:** pure cork, lathe-turned, untreated surface. Can be cleaned with a damp cloth.
