

Toolbox

Arik Levy, 2010

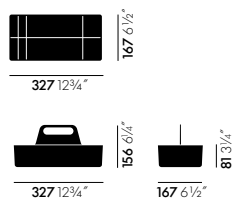

vitra.

Toolbox is a practical organiser. Used to store working materials and accessories, the container can be stowed in a cabinet or on a shelf or trolley. The grab-and-go storage caddy keeps everything easily accessible.

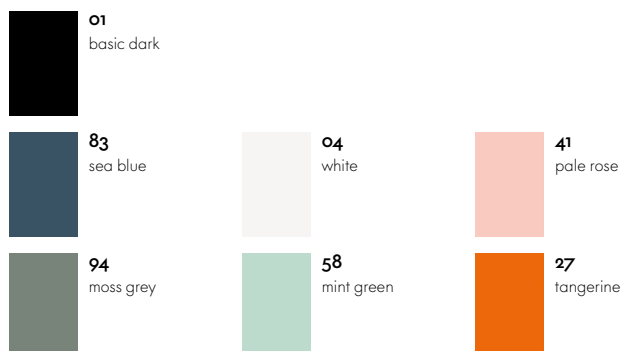

- **Material:** ABS plastic.

DIMENSIONS (in accordance with EN 1335-1)

Toolbox RE

Arik Levy, 2021

vitra.

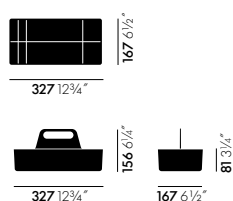

Toolbox is a practical organiser for storing and transporting small working utensils and accessories. The version Toolbox RE is made of recycled plastic – and at the end of its product lifespan, it is also 100% recyclable.

The high-quality recycling material stems from recycled household waste, particularly used packaging. The dark grey hue of Toolbox RE is the natural shade of the processed recycling material, which therefore exhibits very slight irregularities in colour.

- **Material:** recycled polypropylene, 100 % recyclable.
